

Letter of recommendation

Polysan

As to the
results of the implementation of the SSA ERP (Baan) system
at Polysan by GMCS

By this we confirm that in 2006 a team of GMCS consultants successfully completed the project for full-featured implementation of the SSA ERP (Baan) system for a Russian pharmaceutical enterprise, which subsequently (in 2007 and 2008) passed Russian and international certification of compliance to the requirements of GMP standards. It should be noted that the implementation of the Baan 4 system at Polysan was not just the first successful fact of full-featured ERP system implementation in the pharmaceutical industry of the CIS, but also created the foundation for an industry full-featured solution.

Having a high level of competency and large project experience, GMCS consultants solved the complex task of constructing an enterprise management system with account of the specifics of the pharmaceutical industry in terms of production and quality management. As part of the project, GMCS consultants developed a package of primary documents on quality control of produce with account of GMP standards. The project ensured automation of key business processes, including production, procurement, sales, logistics, bookkeeping, thus allowing to sufficiently increase manageability of the company as a whole.

The GMCS consultants team provided a high level of project management. Moreover, we saw honest interest of GMCS specialists in the convenience of the implemented solution for us and in it becoming an efficient management tool. We can say with no exaggeration that joint work on the project gave us a new vision of our own business. We saw for ourselves that the consulting company GMCS doesn't just offer efficient projects and solutions, it also forms proper relations of owners and managers of the company towards business management.

During the project a truly innovative solution was developed – a certain prototype, template was formed, which can be used at pharmaceutical industry enterprises when establishing their own information platforms for implementing quality systems.

We are grateful to the team of GMCS consultants for the volume of works conducted on a highly professional level. At the moment thanks to the works completed by GMCS we are one of the leading pharmaceutical companies in terms of information technologies.
