

## **Letter of recommendation**

### **ROCA Santekhnika**

With this letter we confirm that a team of GMCS consultants successfully completed a project for the localization of the SAP solution for our company, which is a subsidiary of the international bathroom equipment manufacturer Roca Group (Spain).

GMCS consultants solved the complex task of adapting the management system implemented by western specialists of Roca Group based on SAP, in full compliance to the provisions of Russian legislation, The GMCS project group also introduced the possibility of parallel bookkeeping and tax accounting within the system. We are now able to prepare routine and annual reporting which complies with Russian legislation. Also as part of the project, the team of GMCS consultants automated banking operations for us, thus significantly simplifying the procedure of bank accounting.

Together with GMCS we plan to complete the development of our management information system, having localized the processes of goods and materials procurement, production and sales of final products.

We are grateful to GMCS consultants for the volume of works conducted on a highly professional level. We can recommend GMCS as a highly competent project executor on the adaptation of SAP products in Russian offices of foreign companies.

Chief Accountant, ROCA Santekhnika
