

Letter of recommendation

CentreTelecom

With this letter we acknowledge that GMCS is our partner in solving issues of automation of the processes of budget planning and carries out works on the implementation of an automated budgeting system based on IBM Cognos Planning.

Thanks to the technical awareness, competence of GMCS specialists and the high quality of project management system components were launched into industrial operation on schedule and in accordance to the requirements of the company's functional subdivisions.

To us, the works, successfully completed by GMCS at initial stages of the work, were proof that we made the correct choice of project executor. The unconventional approach to implementation of business applications in combination with the high level of qualification of GMCS consultants allow to count on successful completion of the project.

Deputy Head of the Financial Director

Head of the Economic Policy Department

A.V. Bykov
