

Letter of recommendation

Angarsk Electrolysis Chemical Plant

After holding 2 seminars with the participation of SAP, Baan, Vest, Sybase, ABACYS representatives in 1998 within the Department of Information Systems and technologies of the Angarsk Electrolysis Chemical Plant, in 1999 we chose the Baan IV software product. The company GMCS, which appeared as a result of the reorganization of the Russian Baan office, was chosen as the supplier of the Baan IV software product and of the services for its implementation and maintenance starting from 1999 and up to this day.

As part of the Baan project at AECP, GMCS supplied 25 competitive licenses of Baan IV software and 5 licenses of development means packages.

The following services were provided:

- Training key AECP users;
- Setup of the Finance, Sales-Procurement-Warehouses subsystems of Baan according to the conditions of work at the plant;
- Development of the concept of transition to the new Account plan -2002 of bookkeeping within the Baan system and carrying out this transition;
- Development of routine reporting in real time mode (1 minute) according to requirements formed by ISTA employees;
- Consulting on setting up entries on forming tax contributions within the Baan system;
- Support of key users, correcting errors, answers to queries on implementation and operation of the system.

During the years of joint work on the implementation of the Baan project at AECP, GMCS consultants demonstrated high professionalism and good knowledge of the subject field. Today the Baan Finance subsystem operates at our enterprise in industrial mode; work places and bookkeeping subdivisions, sales, procurement, ISTA, PED, FD function, employing over 100 specialists.

All the problems which arose during the implementation were successfully solved with joint targeted efforts and our specialists currently have the confidence and knowledge to expand the baan AECP project.

We are satisfied with the quality of services, products and overall work with GMCS and plan to continue our cooperation when implementing the Process, Service and Production subsystems, as well as when creating a system of tax accounting using the Baan system.

Head of ISTA, AECP

Vyacheslav Svinitskiy
