Reference letter

Ms. Voropaeva,

PJSC "RAO Energy System of East" would like to thank GMCS (a subsidiary of MAYKOR) for implementation of the innovative smart power supply system of Far East Federal district with a high level of quality and professionalism. This project is designed for several years and will result in the unified power supply system built upon the best world practices. The system will support the electricity and heat energy accounting of 1500 000 households and 100 000 commercial customers of Far East Federal district being served by "RAO ES of East".

We believe GMCS to be a trusted partner that has showed high-level expertise and knowledge of energy company's specific features. A joint team of "RAO ES of East" and GMCS supported by specialists of Microsoft Russia has developed a concept of billing solution on the base of MECOMS<sup>TM</sup>, which makes allowance for the specific business processes of our company, as well as the Russian energy market rules.

Up to date, our joint team has successfully completed the first project phase. The system of power supply management based on MECOMS<sup>TM</sup> has been implemented in Kamchatskenergo, a member of the Holding "RAO ES of East". The system MECOMS<sup>TM</sup> is in industrial operation and helps to increase sale effectiveness. The results received thus far confirm the correctness of the adopted development concept and provides facilities for the further solution replication in other enterprises aimed to increase the effectiveness of the energy system operation.

To Ekaterina Voropaeva

President of MAYKOR-GMCS

“RAO Energy System of East” looks for the long-term productive collaboration with GMCS and recommends it as a reliable and responsible partner for implementation of power supply management systems. GMCS is capable of solving complicated problems to a good quality and in due time.

Deputy Director General  
of Energy Sales
